Environmental Policy

Achieving business objectives is always strictly integrated with environmental objectives.

We accept this challenge and plan the development of our business in a responsible and sustainable manner, providing our products to customers, while reducing our environmental impact at the same time.

Thanks to innovations we aim at delivering products and services that are more and more beneficial for the natural environment and our society. Based on this objective, we plan our operational activities and the management of delivery chain.

Natural environment: We are committed to actions for protecting the environment, we focus on preventing and mitigating consequences of our activities. Our environmentally friendly actions focus on: reducing energy consumption, lowering carbon dioxide emission in production processes and logistics and reducing the volume of waste.

Safety: We are committed to guaranteeing a safe and healthy workplace, both for us and our counterparties. Our objective is to eliminate accidents at work, which is possible to achieve owing to the development of competences of our personnel, training and eliminating hazards at working stations.

HS&E Management: Our aim is to make our Health, Safety and Environmental Management System comply with international standards. Its continuous improvement is ensured with audits and a systematically documented process of verifying compliance with local and international standards.

Delivery chain: We are committed to influencing our delivery chain in a favourable manner. We are involved in strategic programmes with our suppliers through trainings, a careful selection of production materials and reducing the environmental impact of our suppliers.
